EDITOR-IN-CHIEF

The editor in chief heads all the departments of the organization and is held accountable for delegating tasks to staff members and managing them. The term is often used in newspapers, magazines, yearbooks, and television news programs.

The term is also applied to academic journals, where the editor in chief ultimately decides whether a submitted manuscript will be published. This decision is made by the editor in chief after seeking input from reviewers selected on a basis of relevant expertise.

MU·RAL /ˈMYŎORƏL/ NOUN PLURAL NOUN: MURALS

• a painting or other work of art executed directly on a wall.

• Purpose; to add color to building walls and streets that would otherwise go unnoticed, which is a treat for locals and tourists alike. Murals attract new local businesses, help bring customers to pre-existing locations, and boost the economy of an area.

Great artists all over New York sought after perfect locations to show off their skill that will make others envy. Growing up in Detroit, MI graffiti was prevalent in the city. Now murals have been commissioned all over the city, the city now is working with artists to revamp downtown Detroit and the surrounding area for some years ago. FishMarketDet believes an artist should have a mural commissioned in their home city. We're glad to announce that we have an artist we strongly believe in and manage to acquire 2 locations to commission a mural.

MID-CENTURY MODERN

FishMarketDet is planning to expand into the new and vintage furniture industry. Our first step into the industry, we're entering with a Mid-Century Modern living room set and a dining set. We'll also be acquiring storage such as trunks, nightstands, and dressers.

A lifestyle brand aiming to influence and improve our customers day to day life with functioning beautiful pieces.

WHAT IS MID-CENTURY MODERN?

Dominating the mid-20th century (the 1940s to the late 1960s) — simple, functional wooden pieces made from teak and curved designs reigned supreme.

Post-World War II designers and architects applied the new technologies and mass production to produce new designs for the booming economy during that time.

"The details are not the details, they make the design." - Charles Eames an American designer.
